## CAREER PROFILE

Web3 Software developer with over 5 years of experience creating responsive and visually appealing web applications. Proficient in utilizing modern front-end technologies to deliver exceptional user experiences. A dedicated professional with a proven ability to collaborate with cross-functional teams and translate design concepts into efficient, high-quality code.

## SKILLS

- Frontend Technologies: React.js, NEXT js, Javascript, Typescript, HTML, CSS, HTMX
- UI Framework: Tailwind CSS, shadcn UI
- Version Control: GIT/GitHub
- Backend: Basic knowledge of Python, Node.js
- Others: Prisma, MongoDB

## EDUCATION

Delta State University, Abraka | BSc Chemistry | October 2014 - August 2019

Binance Masterclass | Binance | January 2021 - March 2021

Software Engineering | Self Taught | Udemy, Codecademy, Youtube | January 2018 - Present

## WORK EXPERIENCE

### Lead Frontend Web3 Developer | Trollbox | October 2023 - Present

- Crafting user-centric interfaces by translating design concepts into responsive, visually appealing experiences, ensuring intuitive navigation and high user engagement.
- Developing quality, easy-to-read, reusable code while upholding best practices and industry standards.
- Maximizing performance by optimizing code to achieve faster load times, delivering a smooth and efficient user experience across all platforms.
- Enhancing visibility and inclusivity by integrating SEO strategies and accessibility making the platform more discoverable and useable for a diverse audience.
- Elevating platform reliability by implementing a comprehensive testing strategy, including unit, integration, and end-to-end tests, significantly reducing bugs and ensuring a stable, high-quality experience.

## **Freelance Web3 Developer | Freeflow | January 2022 - January 2023**

### **Unemployables | April 2022 - April 2022**

- Engineered the NFT smart contract and integrated frontend mint interface on an emergency contract.
- Delivered the project on time, exceeding the client's expectations despite a tight deadline.
- Optimized smart contract for efficiency and security, ensuring seamless, low gas fee transactions.
- Managed project through to the completion of private and public sales, resulting in the successful mint of 5000 NFT arts at 0.025 ETH, generating over \$400,000.

### **Mortal Powers | July 2022 - September 2022**

- Developed and deployed the NFT minting and staking smart contract forming the foundation for the project's blockchain infrastructure.
- Built the frontend minting and staking application, delivering a simple, user-friendly, stress-free interface resulting in high user engagement.
- Autogenerated 7777 NFT artworks from provided traits, enabling the creation of unique digital assets, and enhancing project appeal and marketability.

**Developed 8 blockchain projects across domains, including gaming, NFT marketplace, and token staking.**

## **Frontend Software Developer | Haze Monkey Society | November 2021 - February 2022**

- Teamed up with another software developer to engineer the project from scratch to production.
- Implemented mobile-first design principles to create a visually appealing, responsive interface providing an interactive user experience, driving web traffic to the moon.
- Collaborated with the design team to implement new features and enhance existing functionalities.
- Conducted performance optimizations prioritizing page load speed, and smooth experience resulting in a 30% increase in user engagement.
- Integrated smart contract functions with web3 to enable seamless interactions with blockchain.

## **Lead Frontend Developer | QUATRE FINANCE | August 2021 - April 2023**

- Led and mentored the front-end team as a co-founder, enhancing productivity by implementing streamlined workflow and best practices
- Collaborated with the UI/UX design team to translate complex design requirements into intuitive responsive user interfaces.
- Managed code reviews, raising code quality standards and reducing bugs by 25%.
- Spearheaded the adoption of new technologies and tools, improving development efficiency by 20%.
- Partnered with other cross-functional teams to ensure cohesive integration and alignment.

## **Lead Frontend Developer | OREOSWAP | May 2021 - January 2022**

- Coordinated a team of 7 frontend developers, managing project codebase, assigning tasks, and providing technical guidance.
- Worked with project managers and other team leads to define project goals, structure, and deliverables.
- Led by example by contributing to the codebase while adhering to set code standards, resulting in a clean, readable, optimized codebase.
- Oversaw thorough testing and code reviews to identify and fix bugs promptly.

## **Freelance Frontend Developer | March 2020 - Present**
